---

Full Stack Developer with a background as a Web Designer. Experience working with React, NextJs, NodeJS, Redux, SQL, among other industry technologies, and in agile methodologies such as Scrum, GIT, data structures, algorithms, CSS frameworks, and more.

I am characterized by empathy, adaptability, initiative, curiosity, and have an aptitude for learning, as well as being self-taught. I am a lover of animals and nature.

**TECHNOLOGIES=** HTML | CSS | Javascript | Typescript | React | NextJs | Redux | NodeJs | Express | PHP | MySQL/phpMyAdmin | PostgreSQL

### WORK EXPERIENCE

- **Frontend Developer – SETA (2023)**

Freelance

SETA is a custom-made app for a car wash in Mar del Plata, Buenos Aires. In this project, my role was to handle all frontend production, emphasizing user experience. Relevant tasks included setting up filters for brand, model, and age of a vehicle, as well as creating a step-by-step order process when a vehicle enters the car wash, login, credential management, tariff modifications, among others. My greatest achievement was delivering a fully functional application, with error handling and 100% tested to minimize any chance of bugs. I am currently providing ongoing support to the system owners.

**Tecnologies:** Typescript | Tailwind | NextJs | Figma.

- **Frontend Developer – Findink (2023)**

Collaborator

Findink is a startup focused on connecting tattoo artists with clients. In the project, it was my responsibility to refactor the login (sign-up & register) and forgot password functionalities. These components were implemented with a validator for each input, resulting in a significant improvement in the user experience.

**Tecnologías:** Typescript | Sass | NextJs | Figma.

- **Frontend Developer – Code Partners (2023)**

Software Factory. Freelance

Code Partners is a company whose primary objective is to provide quality IT solutions to each client, in addition to offering 24/7 support after completing the requested project.

Our software factory consists of 6 developers (in addition to myself) with over 2 years of combined experience, offering various service plans depending on the project's needs.

## **PROJECTS**

- **Full Stack Developer – Inventory** 20/09/2023 – 10/10/2023  
Personal project.

Inventory is an application designed to manage the physical inventory of any business or microenterprise. It features a user system as well as products with their respective categories that can be modified, deleted, or created as needed by the user. It offers a complete CRUD (Create, Read, Update, Delete) functionality for each of these areas with which the customer can interact. User: User || Password: user123

**Technologies:** PHP | MySQL | phpMyAdmin | HTML | CSS | Javascript.

- **Frontend Developer – App Livingg** 03/07/2023 – 29/07/2023  
Livingg Soft SAS.

Livingg is an app designed for accommodation search, offering customers the ability to suggest and negotiate prices with hosts.

One of my notable achievements in building the application was designing a visually immersive environment for creating new accommodations and providing a comprehensive preview when modifications are desired. This includes real-time data to ensure that hosts can constantly monitor and display the most relevant information.

**Technologies:** HTML | Javascript | Tailwind | NextJs | Clerk | Prisma | Postgre SQL

## **OTHER EXPERIENCES**

- **Apex America. Cordoba, Argentina – Presential** (2019-2021).  
Apex is a telecommunications company (Call Center), and my role was to serve as a customer service advisor for Claro Argentina.  
My main responsibilities included addressing inquiries and handling administrative tasks conducted through social media channels (Facebook, Twitter, email, etc.).  
One of my achievements was obtaining the title of Assistant Supervisor, where I coordinated a team of 15 advisors. Key tasks included generating reports and planning actions to achieve the team's objectives.

## **PROFESSIONAL EDUCATION**

- Full Stack Web Developer. Henry Bootcamp. 700 hours of theoretical and practical training. June 2023 (Completed)
- Responsive Web Design, Free Code Camp, 300 hours of theoretical and practical training. Febrero 2023 (Completed)
