Lucas Chanquía

Full Stack Web - Frontend Developer

lucaschanquia@gmail.com | Cel. +54 9 3515118325 | Córdoba – Argentina (GMT-3).

Linkedin - Github - Portfolio

My name is Lucas, and I am a web developer determined to give my best in every project I undertake. My goal is to provide quality service and professional growth to be ready for new challenges. I am characterized by empathy, adaptability, initiative, curiosity, and the ability to learn quickly. If that's what you're looking for... contact me!

Skills: **HTML | CSS | Javascript | Typescript | React | NextJs | Redux | Node | Express | PHP | Java | SQL**

WORK EXPERIENCE

- **Frontend Developer – Foccus** (2023- Present)
  At Foccus, I collaborated on creating various components for the e-commerce dashboard. Among these, I can mention the work of combining states to achieve filters across multiple components, the form for uploading new products, and more. Currently, I am working on the user interface to provide the best shopping experience.
  Tecnologies: Typescript | NextJs | Sass | Zustand | Figma | Storybook

- **Frontend Developer – SETA** (2023)
  SETA is a custom-made app for a car wash in Mar del Plata, Buenos Aires. In this project, my role was to handle all frontend production, emphasizing user experience. Relevant tasks included setting up filters for brand, model, and age of a vehicle, as well as creating a step-by-step order process when a vehicle enters the car wash, login, credential management, tariff modifications, among others. My greatest achievement was delivering a fully functional application, with error handling and 100% tested to minimize any chance of bugs. I am currently providing ongoing support to the system owners.
  Tecnologies: **Typescript | Taildwind | NextJs | Figma.**

- **Frontend Developer – Findink** (2023)
  Collaborator
  Findink is a startup focused on connecting tattoo artists with clients. In the project, it was my responsibility to refactor the login (sign-up & register) and forgot password functionalities. These components were implemented with a validator for each input, resulting in a significant improvement in the user experience.
  Tecnologies: Typescript | Sass | NextJs | Figma.
  Link Findink

- **Frontend Developer – App Livinng** (2023)
  Livinng is an app designed for accommodation search, offering customers the ability to suggest and negotiate prices with hosts.
  One of my notable achievements in building the application was designing a visually immersive environment for creating new accommodations and providing a comprehensive preview when modifications are desired. This includes real-time data to ensure that hosts can constantly monitor and display the most relevant information.

Technologies: HTML | Javascript | Taildwind | NextJs | Clerk | Prisma |Postgre SQL

PROJECTS

- **Full Stack Developer – Inventory**   20/09/2023 – 10/10/2023
  Inventory is an application designed to manage the physical inventory of any business or microenterprise. It features a user system as well as products with their respective categories that can be modified, deleted, or created as needed by the user. It offers a complete CRUD (Create, Read, Update, Delete) functionality for each of these areas with which the customer can interact. User: User || Password: user123
  Technologies: PHP | MySQL| phpMyAdmin| HTML | CSS | Javascript.

OTHER EXPERIENCES

- **Apex America. Cordoba, Argentina – Presential** (2019-2021).
  Apex is a telecommunications company (Call Center), and my role was to serve as a customer service advisor for Claro Argentina.
  My main responsibilities included addressing inquiries and handling administrative tasks conducted through social media channels (Facebook, Twitter, email, etc.).
  One of my achievements was obtaining the title of Assistant Supervisor, where I coordinated a team of 15 advisors. Key tasks included generating reports and planning actions to achieve the team's objectives.
